## GAMES ON LOCATION:

# Organization of groups

## Does your class have more than 20 students?

### 1) Playing at one location

Groups can rotate between games. While the first teams are playing, the others can wait at the reception area or explore the surrounding area of the city center. The groups swap once the game finishes.

### 2) Playing at two locations at once

If you need all students to be playing at the same time, simply divide them between our two locations! Both locations are in the center of Prague near Wenceslas Square, which can serve as a meeting point after everyone finishes.

#### OUR TIP!

Upon request, we can provide additional puzzles to entertain the waiting groups
